It's a lot of work being a girl. Doing your hair and makeup every day is exhausting enough, but add in all the other tasks to make us feel and look our best, and it's a huge time commitment, and quite frankly, a pain in the butt! To make life a little easier, here are some practical beauty tips every girl should know and pass on to their besties:

- **Need to dry your nails quickly?** Lightly spray cooking spray (like Pam) on them and your manicure will be dry in a flash!

- **Use an aspirin mask to eliminate an unwanted break out**. Smash up a couple of aspirin and add a few teaspoons of water to create a paste. Spread the paste on the affected area and let sit for 10 minutes – you should see results immediately!

- **If your hair is super out of control frizzy or you haven't washed it in a day and it needs some freshening up** , rub a dryer sheet over your hair – it will leave it smelling fresh and get rid of all your flyaways!

- **Hate it when your fake jewelry turns green?** Put a coat of clear nail polish on all your favorite fakes and they will stay silver forever!

- **Don't have makeup remover and your longwearing lipstick and waterproof mascara won't come off?** Dab some olive oil on a cotton ball and makeup be gone!
